

REGULATIONS HARMONISED AT EUROPEAN LEVEL

**TELECOMMUNICATIONS TERMINAL EQUIPMENT AND RADIO
EQUIPMENT**

SCOPE

'Telecommunications terminal equipment' means any equipment which is intended to be connected directly or indirectly to a network termination point for the purpose of transmitting, processing or receiving information, except for the equipment exclusively intended for accessing radio and television services

'Network' means any electronic communication network that is set up or used to supply the public with electronic communications services, or to supply the public with communication services electronically.

'Radio equipment' means any product capable of communication by means of the emission and/or reception of radio waves with frequencies ranging from 9 kilohertz to 3,000 gigahertz, propagated in space without artificial guide, using the spectrum allocated to terrestrial or space radio communication.

The regulation does not cover infrastructure equipment that is harmonised by Directive 2004/108/EC on electromagnetic compatibility (EMC) and the Low Voltage Directive 2006/95/EC.

The following fall outside the scope of the Directive:

- Equipment and appliances that are exclusively used in activities pertaining to public safety and security, defence, State security or the State's activities in the area of criminal law.
- Ham radio equipment in kits, marine equipment (except for VHF), civil aviation and air traffic management equipment, radio broadcasting receiving and television equipment.
