Article 1. – La Poste shall produce an annual report for each *département* on the accessibility of the postal network, which shall include:

- a) An overall assessment of the public's needs in terms of postal services, taking into account the *département*'s social, economic and demographic characteristics, the geographical features of the *département* itself and neighbouring *départements*, especially in mountain areas, and the existence of rural rehabilitation areas or sensitive urban areas;
- b) The characteristics of its geographical network and a list and locations of the post-office counters making up this network, indicating whether they are run by a private entity, a public entity or La Poste directly;
- c) The nature of the services provided in these different types of post-office counter and the extent to which they match the public's needs;

Article 2. – La Poste shall submit the annual report to the *département* postal coverage committee, which shall have two months to deliver its opinion.

Having received this opinion or, in its absence, upon expiry of the period specified in the first paragraph, La Poste shall adopt the annual report and send it, accompanied by the opinion of the *département* committee if one has been delivered, to the government representative and the chairman of the *département* postal coverage committee.

Within a month of the sending of the report, the government representative shall inform La Poste whether he has decided to initiate the local consultation procedure provided for in subparagraph (II) of section 29 of the above-mentioned law of 4 February 1995. If not, La Poste may implement the measures on which it has decided.
